

International Journal of Future Computer and Communication

CONTENTS

Volume 5, Number 4, August 2016

• Computer Science

- Shadow Removal Algorithm Based on RGB Color Space.....167
Bailin Lin and Zheng'an Xiao
- Subsequence-Based Dynamic Web Service Composition.....172
Ping Liang and Sartra Wongthanavas
- An Adaptive Intelligent Presentation Edugame for Fardu Ain Learning Using Production Rules Based on User Emotions.....176
Rahmah Mokhtar and Nor Azan Mat Zin

• Wireless Communication Technology and Application

- Device-Free Home Intruder Detection and Alarm System Using Wi-Fi Channel State Information.....180
Mohammed Abdulaziz Aide Al-qaness, Fangmin Li, Xiaolin Ma, and Guo Liu
- HIS-RECT Nonlinear Compandique Technique for MC-CDMA MIMO Transmission.....187
Varus Mbembo Loundou, Jie Yang, Nouhoum S. A. Galeb Yari, and Dong Doan Van
- Middleware for Multi-sensors Context-Aware System to Control the Smart Laboratory Room.....194
Khamla Non-Alinsavath, Lukito Edi Nugroho, and Agus Bejo
