

International Journal of Future Computer and Communication

CONTENTS

Volume 6, Number 2, June 2017

• **Computer Network and Information Technology**

- Delta Communication: The Power of the Rich Internet Applications.....31
Nalaka R. Dissanayake and G. K. A. Dias
- Distributed Packet Processing Architecture with Reconfigurable Hardware Accelerators for 100Gbps Forwarding Performance on Virtualized Edge Router.....37
Satoshi Nishiyama, Hitoshi Kaneko, and Ichiro Kudo
- Machine Learning for Authorship Attribution in Arabic Poetry.....42
Al-Falahi Ahmed, Ramdani Mohamed, and Bellaafkih Mostafa
- A Study on Using a Smartphone to Broadcast Basketball Games: Prototype Tests Based on a Video Calling/Conferencing Platform.....47
K. L. Wang and Y. H. Chen
- Meaning Estimation Method of Alphabetical Abbreviation Using Lexical Conceptualization and Wikipedia.....53
Kazuto Goto, Seiji Tsuchiya, and Hirokazu Watabe
- Channel Coded Processor for Enhanced Safety.....58
A. Steinkirchner, T. Fuhrmann, and M. Niemetz
- Mail Detection Model of Campus Network Based on the Adaptive Learning Algorithm.....63
Bin Chen, Yizhou Dong, and Mingrong Mao
- #### • **Signal Analysis and Processing**
- Study on the Prediction Method of Fusion Recognition for Characteristic Information of Coal Spontaneous Combustion.....67
Wei-Feng Wang, Jun Deng, Yuan-Bin Hou, and Nai-Guo Wang
- Reversible Data Hiding Using Pixel Order Exchange.....72
Hsiao-Ling Wu, Chin-Chen Chang, and Thai-Son Nguyen
